Reading > Lesson 7: Sentence Addition Questions > Exercise 7.1

DIRECTIONS: Read the new sentence and the passage that follows. Click on the square [...] that marks the best position for the sentence.

[Review](#)[Continue](#)

- 1 Look at the four squares [...] that indicate where the following sentence could be added to the passage.

Next, information is stored in the system.

Click on the square [...] that marks the best position for the sentence.

Glossary

storehouse: a building where items are kept for future use

Do you remember what you had for breakfast this morning? Can you recall what happened on your last birthday? Of course you can. But how is it possible for human beings to travel back in time so easily? Following is a current theory on the process and function of basic memory systems. [...] Many people think of memory as "a dusty **storehouse** of facts." According to experts, in reality, memory is an active system that stores, organizes, alters, and recovers information. [...] In some ways memory simulates a computer. [...] Incoming information is first encoded, or changed into a usable form. This step resembles typing data into a computer. [...] Finally, memories must be retrieved from storage to be useful. If you're going to remember all of the 9,856 new terms on your next psychology exam, you must successfully encode, store, and retrieve them.
